ABUNDANT LIFE

by ORAL ROBERTS

HOW GOD VISITED GENERAL CLARK

During our Charleston, South Carolina Crusade, I had the privilege of visiting the Citadel, South Carolina's "West Point." General Mark Clark was my gracious host, and while I was there, he told me the following inspiring story, which I believe he will be glad for me to share with you. God visited the General in a crisis and helped him through one of the most desperate problems of World War II. At the last moment, before the invasion of Europe, orders came from Washington altering the invasion plans and removing the protective covering of 15,000 paratroopers who had been designated to protect the landing of General Clark's men. The General tells in his own words how God helped the Americans to meet this emergency and gave their leader strength and wisdom to lead his men to victory.

"There I was on the night of September 5—my plans twisted, yet knowing we must sail the next morning.

"Did the Germans know about the invasion? How much did they know? Just what would we run into?"

"All these things were running through my mind, and with the fate of so many thousands of men, as well as the hopes of the free world, resting upon the success of the invasion, I was literally overwhelmed with a sense of my responsibility.

"Troubled and worried, I went to my cabin. A sense of my own helplessness swept over me. I desperately needed help from some greater power.

"I picked up a little book of devotions and began to read. I turned to the prayer for September 5. There I read the following inspiring lines:

*Father, in Thy name I pray,
Let me know Thy will today,
With Thee I am unafraid,
For on Thee my mind is stayed,
Though a thousand foes surround,
Safe in Thee I shall be found.*

"As I began to read, the words seemed fairly to leap off the page at me. A sense of another presence overpowered me. A great reassurance of the rightness of our cause, as well as the certainty of ultimate victory, came. God was with me. I knew it. I felt his presence! And a glad thankfulness rose in my heart. I knew we would succeed.

"As I finished reading, I was literally overwhelmed. And I can tell you, I slept better that night.

"We sailed early the next morning with a convoy of about seventy ships. Ten minutes before midnight I stood with Admiral Hewitt on the bridge of the *Ancon*. The naval phase of the assault was completed.

"Then the incomparably brave officers and men of the Fifth Army started that last dash toward the beaches. Their fierce fighting, their countless inspiring acts of heroism and the ultimate victory are written in our nation's history—but that is another story. My purpose here is to say very simply and sincerely that I will always thank God for his visit to me in my hour of desperate need."

The Bulletin, Mount Joy, Pa., Thursday, September 11

The Editor
Mount Joy Bulletin
Mount Joy, Penna.

Dear Editor:
In the Space Age the people of the world are made to bear the greatest responsibilities of all time. If our ideology is to endure, we must meet the challenge with speed, certainty, and apprehension. Our future security rests entirely upon higher education in virtually all areas of learning. However, the scientist will play not only an important role, but a decisive one. Most of the educational institutions in the nation are now reappraising and reconstructing their courses of study, especially in the areas of rhetoric, mathematics, and the sciences. It is also presumed that our local educators have re-examined their curricula, both academic and otherwise. However, there has been little mention of any such survey or reorganization, save several somewhat misleading statistics.

I. (Fact) Chemistry is presently offered in the senior year, following physics, contrary to the conventional order of most creditable institutions. (Opinion) Physics requires much more mathematical background than chemistry and generally more difficult. (Question) What is the explanation of this irregular procedure?

II. (Fact) Mathematics at our local high school consists of the following sequence:
Basic algebra - Year Nine,
Intermediate algebra - Year Ten,
Plane geometry - Year 11,
Solid geometry, trigonometry, and advanced algebra (more correctly termed algebra in review) - Year 12.

(Opinion) If chemistry and physics were interchanged as suggested, the student will

still lack trigonometry in the twelfth year, which is prerequisite for the basic understanding and appreciation of physics. The following course of study might be more appropriate in the Space Age, yet moderate relative to some progressive high schools existing in this country:

Basic algebra - Year Seven-Eight,
Intermediate algebra - Year nine,
Plane Geometry - Year 10,
Solid geometry and trigonometry - Year Eleven,
Analytic geometry and calculus - Year Twelve.

(Question) Many schools have already instituted this course of study. Why hasn't this been tested in our school district?

These two specific examples are only a few of the imperfections existing in our local high school. It would be in the public interest for our school administrators to disclose openly their present and future intentions regarding academic studies.

Very truly yours,
Harold Krall, Jr.

THE BULLETIN

Has Something No Other Publication Can Give You

WHEN you are spending your money for advertising you want to make sure that every dollar will go where it brings back maximum returns.

Here is something for you to consider in this connection.

By advertising in The Bulletin you get something no other publication in this field can give you . . . a PLUS that assures greater value for your money. You get "following" that dates back to 1901. You get reader acceptance that has been building up steadily for 57 years.

The Bulletin has been doing business in this field so long that it has become a tradition. To farmers, laborers, citizens and allied industries The Bulletin has become part of their way of life. It is the only medium that enables you to reach all of your prospects in one operation.

Add it all up and you will see that it is smart to tell your story in these columns regularly—display or classified.

This is a real opportunity. The fact that it is before you from week to week in no way diminishes its importance to you, and in no way lessens the loss you sustain if you fail to take advantage of it.

ABOUT THIS QUESTION:
Lightning burned my barn to the ground. We got the cattle out, but my complete hay crop and stored grain went up in the smoke. Can you tell me why a farmer will carry fire insurance on his barn, yet neglect his stored crops?
