the weather by sam miller

No wonder women live longer than men—Look how long they are girls.

There usually is plenty of room at the top because 2 and 3, cloudy; 4 and 5, some of those who get there go to sleep and fall off.

The first four days of September is almost free from planetary afflictions which should give us a low accident rate for that time. Sept. 5, there is some danger around water. We may also have fog around this time. Sept. 11, is an accident cycle concerning transportation. Sept. 16, the sun will turn to cold Saturn. This can give us a cool spell. September will be on the mild side for the season.

Some severe storms are marked before the month is out.

Weather - Sept. 1, clear; 2 and 3, cloudy; 4 and 5, partly cloudy on the warm side; 6 and 7, unsettled; 8 and 9, partly cloudy; 10, 11, 12 and 13, unsettled; 14, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28 and 29.
