Potato-Grain Law Outlined

By ASC Official

A Potato - Livestock Feed Diversion Program has been approved for all counties in Pennsylvania, Landis G. Becker, Chairman of the Lancaster County Agricultural Stabilization and Conservation Committee announced this week.

The 1961 Potato Diversion Program has been authorized by the United States Department of Agriculture in order to encourage the domestic consumption of fresh Irish potatoes produced in United States by diverting them from normal channels of trade and commerce.

The Diversion Program offers to make payments to potato growers for diversion of the 1961 crop of potatoes for use as livestock feed. Payments per hundred pounds of potatoes will be 60 cents during the months of October, November and December.

The potatoes must meet certain specifications, which are equal to or better than the quality requirements for U. S. No. 2 Grade.

Potatoes diverted for livestock feed must be processed by cutting, chopping, slicing, or crushing to a degree which will render them unsuitable to enter into normal channels of trade and commerce as potatoes. For further information potato growers should contact their local county Agricultural Stabilization and Conservation Service office, Becker said.

Potatoes diverted for livestock feed must be processed by cutting, chopping, slicing, or crushing to a degree which will render them unsuitable to enter into normal channels of trade and commerce as potatoes. For further information potato growers should contact their local county Agricultural Stabilization and Conservation Service office, Becker said.
