"Over the Back Fence"

by Max Smith

THERE SEEMS to be a lot of speculation concerning the amount of winter wheat that farmers are going to plant this fall; with the defeat of the government wheat control program earlier this year, some may feel that the acreage will jump in large proportions. I doubt if this will happen and sincerely hope that it doesn't; there will be little value in adding more bushels of wheat to the existing abundance; however, livestock and poultry producers that plan to feed the wheat grain and need the straw for bedding material, might be economically justified to produce what they need on their own farm.

Max Smith

CONSIDERABLE RESEARCH indicates that there may be a nutritional advantage for high-moisture shelled or ear corn silage in rations for fattening cattle. However, studies with dairy cows indicate that no difference can be expected in milk production, when cows are fed a high moisture corn that has been ensiled, or an equal amount of dry matter as dry corn. It is usually more economical to ensile the entire corn plant than any single part of it.

HAVE YOU noticed some or your shade trees with a discolored or dead tip or edge on the leaves? If so, join the ranks of many of us who have trees suffering with leaf scorch. This results from the lack of adequate water. During the past six months very few parts of the county had sufficient rainfall to soak down to the tree root zone. The solution to the problem is to soak the soil around the tree roots every two weeks to a depth of two feet or more. This is not a disease; it is a moisture condition.

OUR PENN STATE lawn experts advise us to keep mowing the lawn in the fall as long as the grass will grow; many home-owners lose interest and ambition to mow the lawn in the fall when colder weather arrives. In the case of the bluegrass lawn, the grass will grow faster in the fall months with the cooler weather and the larger amounts of rain fall. Don't put away the lawn mower until cold and freezing weather stops the growth of the grass. Long, matted grass on the lawn going into the winter may result in severe outbreaks of snow-mold.

THIS DOESN'T surprise Lancaster Countians, does it?

BOOKMOBILE

- FIRST TUESDAY
Mount Joy Memorial Park
1 to 8 p.m.
- SECOND TUESDAY
Mastersonville Fire Hall
10 to 12 a.m.
and
Manheim Square
12:30 to 4 p.m.
- THIRD TUESDAY
Bainbridge Post Office
10 to 12 a.m.
and
Marietta Square
12:30 to 4 p.m.
- FOURTH TUESDAY
Landisville Fire Hall
10 to 12:30 a.m.
and
East Petersburg Bank
12:30 to 4 p.m.

Hot or Cold, It's Sundaes

Summer or winter, sundaes take their place as the most delightful of treats. As a dessert or as a snack, for youngsters and grownups alike, ice cream with a melon sauce is just about tops for the taste buds.

Molasses combines with a variety of other pleasant ingredients to provide wonderful sweet sauces.

Chocolate Taffy Sauce

1 package (6 ounces) semi-sweet chocolate morsels
1/2 cup evaporated milk
1/2 cup molasses
Combine semi-sweet chocolate morsels and evaporated milk in top of double boiler. Place over hot (not boiling) water, stirring occasionally, until chocolate is melted. Remove from heat; stir in molasses. Spoon over ice cream. Makes 1 1/2 cups sauce.

Molasses Taffy Cream

1/2 cup butter
1/2 cup sugar
1/2 cup molasses
1/2 cup evaporated milk
1 teaspoon vanilla
Melt butter in saucepan; add sugar and molasses. Bring to a rolling boil; reduce heat and boil 2 minutes, stirring constantly. Remove from heat; cool. Stir in evaporated milk and vanilla. Spoon hot or cold over ice cream. Makes 1 1/2 cups of sauce.

Pineapple Rum Sauce

1 can (9-ounces) pineapple tidbits
1/4 cup molasses
1 tablespoon butter or margarine
1/2 teaspoon rum flavoring

Fire Co. Opens Drive

A drive for funds for op-Alcoa Foundation scholarship expenses was begun Monday night by the Manheim Fire company, and will close on Oct. 14. Cards have been distributed to homeowners in the Manheim Sporting Hill and Park Hill areas.

The drive was made necessary by the fact that the fire company can no longer raise funds by holding carnivals and bingo games as in the past.

Newton Davis Hershey, a junior at Bucknell University, and son of Dr. and Mrs. I. Newton Hershey of Manheim, has been selected by the University for an

award on the basis of his "outstanding academic achievement and future scholastic promise." He is majoring in chemistry. The award carries a monetary value of \$625.

18th Birthday

The Manheim Auto Auction, largest in the world, celebrated its 18th birthday with a two-day party Sept. 12-13. Cash prizes and chicken barbecues worth \$18,000 were given away to car dealers. Grand prize was a two-weeks trip to Hawaii for two (Turn to page 7)

Propose Sewage System

A sanitary sewage system, to cost nearly \$1 million, has been recommended for Marietta borough and neighboring Irishtown and Maytown.

A feasibility study made by Buchart-Horn Engineers, York, outlining this proposed system was taken under study Tuesday night by Marietta Borough Council.

The joint system serving the three areas was one of three proposals offered by Buchart-Horn.

The second would have Irishtown and Marietta operating under one system and

Maytown operating alone in another. The third alternative presented would have a single system serving Marietta and Irishtown and Maytown being served under a separate system.

Although exact cost estimates were not disclosed, the engineering firm's representative Harry Wagner told Marietta's councilman the three community combined system would cost less.

For this system, the cost would be "within several hundred thousand dollars of (Turn to page 4)

Aids Medical Planning

An Elizabethtown man, D. Paul Witmer, former resident of the borough, was one of those responsible for planning to start a medical center by the Milton S. Hershey Foundation, announcement of which came a few weeks ago.

Mr. Witmer was chairman of the board of managers of the Milton Hershey School in 1959 when it celebrated the 50th anniversary of its founding, and plans for the medical center were begun in that year.

The new institution will become the seventh medical

school in Pennsylvania. Five of them are in Philadelphia — Jefferson, Hahnemann, University of Pennsylvania, Temple University and Women's. The University of Pittsburgh Medical School is only one outside of Philadelphia.

The new medical center in no way will detract from the work carried out with the boys' schools.

To be known as the Milton Hershey Medical Center, the school will enroll about 300 students, and the hospital will be able to accommodate between 200 and 300.

It probably will be located on a tract of land bounded on the north by the Hershey-Harrisburg road; on the south by Wood street; and in the approximate area of the westernmost Hershey Farm.

The hospital will be operated by the Pennsylvania State University. Construction for the hospital is scheduled to begin in one year, and first students may be admitted on a limited basis within two years.

Fifty million dollars have been earmarked by the trustee for the medical center. Approximately half of that amount will be used in the construction of the center; the other half will go into an endowment fund to underwrite the center's operations.

Sound driving calls for lower speed on residential streets, particularly near parked cars. Most child traffic accidents occur when a youngster runs into the street from behind a parked car.

The WORRY CLINIC

Case Records of a Psychologist

By - George W. Crane, Ph.D., M. D.

Cal indicates some of the latest scientific methods that are used in modern salesmanship. But all star sales men learn to watch the "psychic weathervanes" to see which way the winds of customer interest are blowing. Send for the booklet below. It is valuable to clerics, teachers and doctors as well as commercial salesmen.

CASE M-455: Cal H., aged 35, is a talented automobile salesman.

Dr. Crane," he said, "we have a large display room with several tables lined up in a row.

"We let the prospect and his wife sit on one side while the salesman faces them.

"After we have put on our sales talk and the prospect is still uncertain, we salesmen may then hear a tiny click-click, for what the customer doesn't know, is that we have a hidden microphone at each table.

"The Big Boss thus can listen to what goes on. And when he thinks it wise, he signals us with this click-click.

"That sound doesn't mean a thing to an outsider, but it tells us salesmen to excuse ourselves for a minute so the prospect and his wife can be left alone.

"We then hasten into the inner office where the Big Boss is sitting at the microphone.

"Then we all eavesdrop to

find out what is the final 'straw' that seems to be tipping the scales against our sale.

"Generally, the husband and wife will make some such remark as 'If they'd just allow us \$50 more on our old car as a trade-in, we'd make the deal'.

"Well we salesmen then casually saunter back to the prospect, as if we have never heard a word he has been saying to his wife, and then we summarize our chief sales points, but end with the remark that his car has been kept in very good condition, so maybe we could stretch a point and allow him an extra \$50 on the trade-in.

Heart Disease At New High

Heart disease claimed 52,751 deaths in Pennsylvania last year, a new high for the disease which has been the principal cause of death in the state for 39 years.

The State Highway Department said the previous high was 51,735 deaths in 1961.

Arteriosclerosis (hardening of the arteries) and coronary heart disease (disease of vessels feeding the heart muscle) accounted for 39,803 deaths or 75 per cent of all heart disease deaths, the Department said.

Dr. Charles L. Wilbar, state health secretary, said there are promising new drugs which can effectively lower blood pressure and diets which can assist in lowering blood fats, sometimes associated with heart disease.
