Tips on Buying Chest of Drawers

Chests of drawers may be copied from originals of Early American, Provincial, Italian, or English styles. New styles may be a blend of the traditional designs. But whatever style you choose, the chest should look well by itself and mix easily with furniture of other periods, reminds Helen E. Bell,

home management specialist at the Pennsylvania State University.

A chest with a design and style that make it serve many uses is a wise choice. You may want to use it in any room of the house for storage.

Construction is important when choosing a chest, Miss Bell says. Rub your hand on the top and sides of the chest to check for smoothness of the finish. Look at the joints to note excess glue under the finish.

Drawers should have well-fitting side and bottom pieces so drawers slide in and out easily. Be sure drawers are well-sanded both inside and out so garments won't snag.

Look for a chest that has dust panels between drawers to protect clothing when the drawers are opened and closed, suggests Miss Bell. A glider on the bottom or sides of drawers helps them to open and close smoothly.

The chest should stand evenly on the floor, and gliders on the bottom of the chest or legs help you to move it easily. Find a chest with simple designs that will be easy to care for are your best choice, she adds.

A good series for a magazine would be 'Why I Failed,' but it will never be done, except by ghost writers who have not failed.
