Develop New Potato Variety

Pennchip, a new potato variety for chips and table use, has been announced by the Agricultural Experiment Station at The Penn State U. On the basis of laboratory tests, Pennchip is superior to varieties now grown in Pennsylvania for the potato chip industry, according to W. R. Mills, Station researcher who developed the variety.

Designed to replace Kennebec and Russet Rural for the potato chip industry, Pennchip has surpassed consistently the standard varieties in chipping quality, Dr. Mills says, both at harvest and after cold storage.

Evaluations during the past seven years have shown Pennchip to be high yielding, resistant to late blight and scab, and probably immune to wild mosaic.

Seed supplies will be increased next summer, he announces, and should be available for planting in the spring of 1965.

Yields of Pennchip have been about equal to that of Katahdin, Kennebec, and Russet Rural, Dr. Mills reports. Cooperating on the development were the Wise Potato Chip Company of Berwick and Barnett Brothers of Coudersport.

In chipping studies, Samples of Pennchip and Russet Rural were held five months at 38-40 degrees F., then removed to 70 degrees F. and chipped immediately and at weekly intervals for 6 weeks. Pennchip made excellent chips after three weeks at 70 degrees, and continued to do so to the end of the trial. Chips made from Russet Rural were very dark after 3 weeks storage and borderline in color after 5 or 6 weeks when the chipping tests were ended.

Present Flag

Mrs. Elmer Zink, 440 East Front Street, has presented a new 50-star American flag to the Marietta Elementary School to be used on a stainless steel flagpole recently installed by the Donegal Union school board.

The flag was used to drape the coffin of Elmer Zink, a World War I veteran who died earlier this year.

The school has been without a flagpole since an addition several years ago. The new pole, approximately 35 feet high, is guaranteed to last a life time. The cost to the school district was \$500.

Sporting Hill

An informative film "Bits of Time", will be shown at the second meeting of the Sporting Hill Parent-Teachers Association, on Monday, Nov. 18, at 7:30 p.m. in the Sporting Hill elementary school.

The film shown by Herbert K. Kraybill, will make known the services available thru the United Campaign.

The devotions will be led by Mrs. Minnie Hackman. Fifth and sixth grades, under the direction of Mrs. Thomas, will provide the special music.

A social hour will conclude the meeting.

DON'T STORE EGGS IN HEATED ROOMS

Egg producers should find a better place than a heated basement to store eggs during the winter, says Carl O. Dossin, Penn State extension poultry specialist.
