

# List Annex Honor Roll

Six students won places on the All - A honor roll at the Donegal Annex for the fourth report period. They included three eighth graders, Lolita Mumma, Alice Kleiner and Barry Meckley, and three seventh graders, Kent Wolgemuth, Kathy Ney and Terrie Gemberling.

Fifteen eighth graders made the "A and B" honor roll as follows: Marjorie Sloan, Donna Eichler, Ruthie McConnell, Kay Bell, Bonita Shoemaker, Kathleen Shoemaker, Nancy Rolfs, Susan Hess, Deborah Hess, Brenda Gillham, Bonnie Engle, Elaine Brown, Cory Funk,

Gloria Sutter and Donald Robinson.

Twenty-five seventh graders made the "A and B" honor roll as follows: Patricia Way, Carolyn Keener, Carole Hess, Richard Smedley, Marvin Nissley, Mary Ellen Shearer, Marlene Rutt, Doris Reist, Joseph Bixler, Jeffrey Witman, Cheryl Zuch, Philip Wade, Ronald McCarty, Charles Engle, Timothy Emmeheiser, Patty Zinn, Jean Thome, Elaine Hess, Dawn Heisey, Janine Eshleman, Teresa Wagner, Dawn Eshelman, Cynthia Eshelman, Robert Waters and Richard Hop-

# Select Bulbs For Specific Purpose

It may not be so simple as it first sounds to choose the right lightbulb for home decorating, reminds Helen Bell, extension home management specialist, the Pennsylvania State University.

Manufacturers have designed four different types of lightbulbs finishes to improve quality and to meet special needs. Finish may be described as inside frosted, ceramic finish, tinted pastels and silvered bowl.

Developed to reduce the brightness of clear lightbulbs, the inside-frosted finish absorbs only a small amount of the light. But the brightness is less than that of the clear bulb and sharp lines are reduced.

Bulbs with a ceramic or milky white finish have a coating of fine white silica particles on the inside of the bulb, Miss Bell explains. Light is distributed over the entire bulb surface, with no bright spot near the filament. With a ceramic finish, harsh shadows are eliminated.

Tinted pastel bulbs are made by the same process as the ceramic white bulb, and both provide the same diffusion and softness of illumination. The colored coating absorbs some light. Tinted bulbs are designed to accent or complement certain colors.

Designed primarily for base-up fixtures, the silvered-bowl bulb is a standard inside-frosted bulb with a silver coating on the bowl end. It's often used where inside frosted bulbs have been used for general lighting. Miss Bell cautions against using an ordinary bulb in a fixture or lamp designed for a silvered-bowl bulb.

### NOT RESPONSIBLE

When you take clothes to your drycleaner, remember that he's not responsible for the loss of articles left in pockets, cautions Ruth Ann Nine, Penn State extension clothing specialist. Your cleaner will appreciate your careful inspection of pockets before garments leave your house.

### TOP DONEGAL TALENT

The "Four Winds," a quartet composed of Warren Hoffman, Tom Long, Tom Hayden and John Hart, won first place in the annual Talent Show held at the Donegal High School by the Student Council.

When in need of printing, remember The Bulletin.

The pill-box shown is simple to crochet. It may be worn on the back of head or pixie style. Pattern No. 810 gives the instructions.

Our new 1964 Needlework Book contains a fine selection of crochet, knit, embroidery, quilts, etc., and includes instructions for four designs and also coupon entitling you to any pattern of your choice, free. Send 50 cents.

Send 25c plus postage in coins for this pattern to MARTHA MADISON (care of this newspaper), Box 1490, New York 1, N. Y. Add 15c for first class mail.

# Remedies Fuse Trouble

While waiting for their new sanctuary to be built the congregation of a posh West Coast suburb is meeting in an old farmhouse. Unfortunately, the wiring system, we hear, is not as up to date as the electric organ and the 48-cup percolator that minister to the spirit of worship and fellowship respectively. If the coffee maker is plugged in while the organ is playing the fuse goes phfft, and everything comes to a halt. Faced with "cold" hymns during the service or cold

coffee afterward, the committee in charge has solved the dilemma by posting an usher where he can watch the lady organist and still be handy to the kitchen. Whenever she signals that she is about to play, he whips around the corner and unplugs the percolator. The musical number finished, back he goes to start the java again. If there are not too many hymns or too long an anthem, the coffee is steaming and strong by the last Amen. —Selected

# Trouble Starts In Starter

Trouble with the family car often starts with the starter.

In fact, says Samuel T. Milliken, Service Manager for Keystone Automobile Club, many "can't start" situations at first attributed to dead batteries or faulty ignition eventually are traced to troublesome starters.

"The electric self starter is a sturdy device and usually last the life of the car with normal use", he said. "But, starters need attention and

care and repairs, sometimes, too. The starter's brushes or commutator might be worn and need repair. Roughness and pitting of the commutator, poor brush contacts, or just plain dirt can cause a starter to break down.

"It should be remembered that weather affects starters; particularly cold weather, which, combined with heavy oil, makes the starter crank sluggishly. Under such conditions the driver never should use the starter too long at a time because overheating could burn out the starter.

"When a starter won't turn the engine over a mechanic quickly can locate the trouble by testing the starter with the car's lights turned on. If the lights glow dimly the battery probably is low on power. Should the lights go out when the starter key is turned or pressed, there could be a poor connection between the starter motor and the battery; perhaps caused by corrosion of the battery terminals. Such a condition can be corrected by cleaning the terminals and coating them with petroleum jelly.

"When the car's lights dim and the starter moves very little or not at all, either the battery is run down or mechanical trouble in the starter or engine is adding its burden. When lights remain bright and the starter fails to crank, the trouble often can be traced to an open circuit in the starter, in the starter switch, or in the control circuit. When the starter spins but fails to crank the engine, look for broken teeth in the flywheel ring gear or a defect in the drive mechanism.

"The starter is a mighty important device on your car. Have it checked regularly, at least once a year."

### COMPLETES TRAINING

David W. Brandt, son of Mr. and Mrs. Robert Brandt of 142 North Market Street, was scheduled to complete basic training March 20 at the Naval Training Center, in San Diego, Calif.

The nine-week training includes naval orientation, history and organization, seamanship, ordnance and gunnery, military drill, first aid and survival.

# Children Alone Invites Fires

Leaving little children at home alone is an invitation to fire, says the National Board of Fire Underwriters.

Too many times each year, children left at home alone have started playing with matches with tragic consequences.

Never leave children alone for a minute. If you are going out, arrange for a competent baby sitter or call in a neighbor to watch after them while you are away.

Before leaving a sitter with the children, be sure that she knows what to do if there is a fire.

She should, first get the children out of the house, then call the Fire Department.

### JUNIOR F. H. A.

The Donegal chapter of the Junior FHA met Wednesday, March 18, with a Red Rose chapter session. Cake decorating was explained and demonstrated.

# CHANGE-OF-LIFE...

does it fill you with terror  
 ...frighten you?

READ HOW COUNTLESS WOMEN HAVE FOUND  
 THE WAY TO OVERCOME CHANGE-OF-LIFE FEARS

Have you reached that time of life when your body experiences strange new sensations—when one minute you feel enveloped in hot flushes and the next are clammy, cold, drained of energy, nervous, irritable? Are you in an agony of fear? Too troubled to be a good wife and mother?

Don't just suffer from the suffocating hot flashes, the sudden waves of weakness, the nervous tension that all too frequently come with the change when relief can be had.

Find comforting relief the way countless women have, with gentle Lydia E. Pinkham Tablets. Especially developed to help women through this most trying period. In doctor's tests 3 out of 4 women who took them reported welcome effective relief. And all without expensive "shots."

Don't brood. Don't worry yourself sick. Get Lydia E. Pinkham Tablets at your druggists. Take them daily just like vitamins.

The gentle medicine with the gentle name **LYDIA E. PINKHAM**
