His project, "Centrifuge-Effect on Mice," was selected from approximately 100 other science entries, by a representative from the U. S. Navy on April 1st in the Ephrata high school auditorium.

The first place winner of the Navy Science Cruise wins a five day tour of the Atlantic and visits two Navy installations and scientific projects.

In Dennis's project he demonstrated the effect of high gravity on mice. He ran mouse "A" through 30-second runs at 46 r.p.m. and then placed it in a maze to test the centrifuge's results. Mouse "B" was placed only in the maze test.

Twelve tests were run and with averages from these tests Dennis proved that high gravity affected mouse A.

Run your finger over a map and find yourself a place to go. That's a preview of how it feels to get there in a Chevrolet.

We've put what we think is the best suspension system in its class under this great highway performer. A big husky coil spring at each wheel and double-action shock absorbers to soak up bumps. Over 700 sound deadeners throughout the chassis and that spacious Body by Fisher to blot out noise from road and wind.

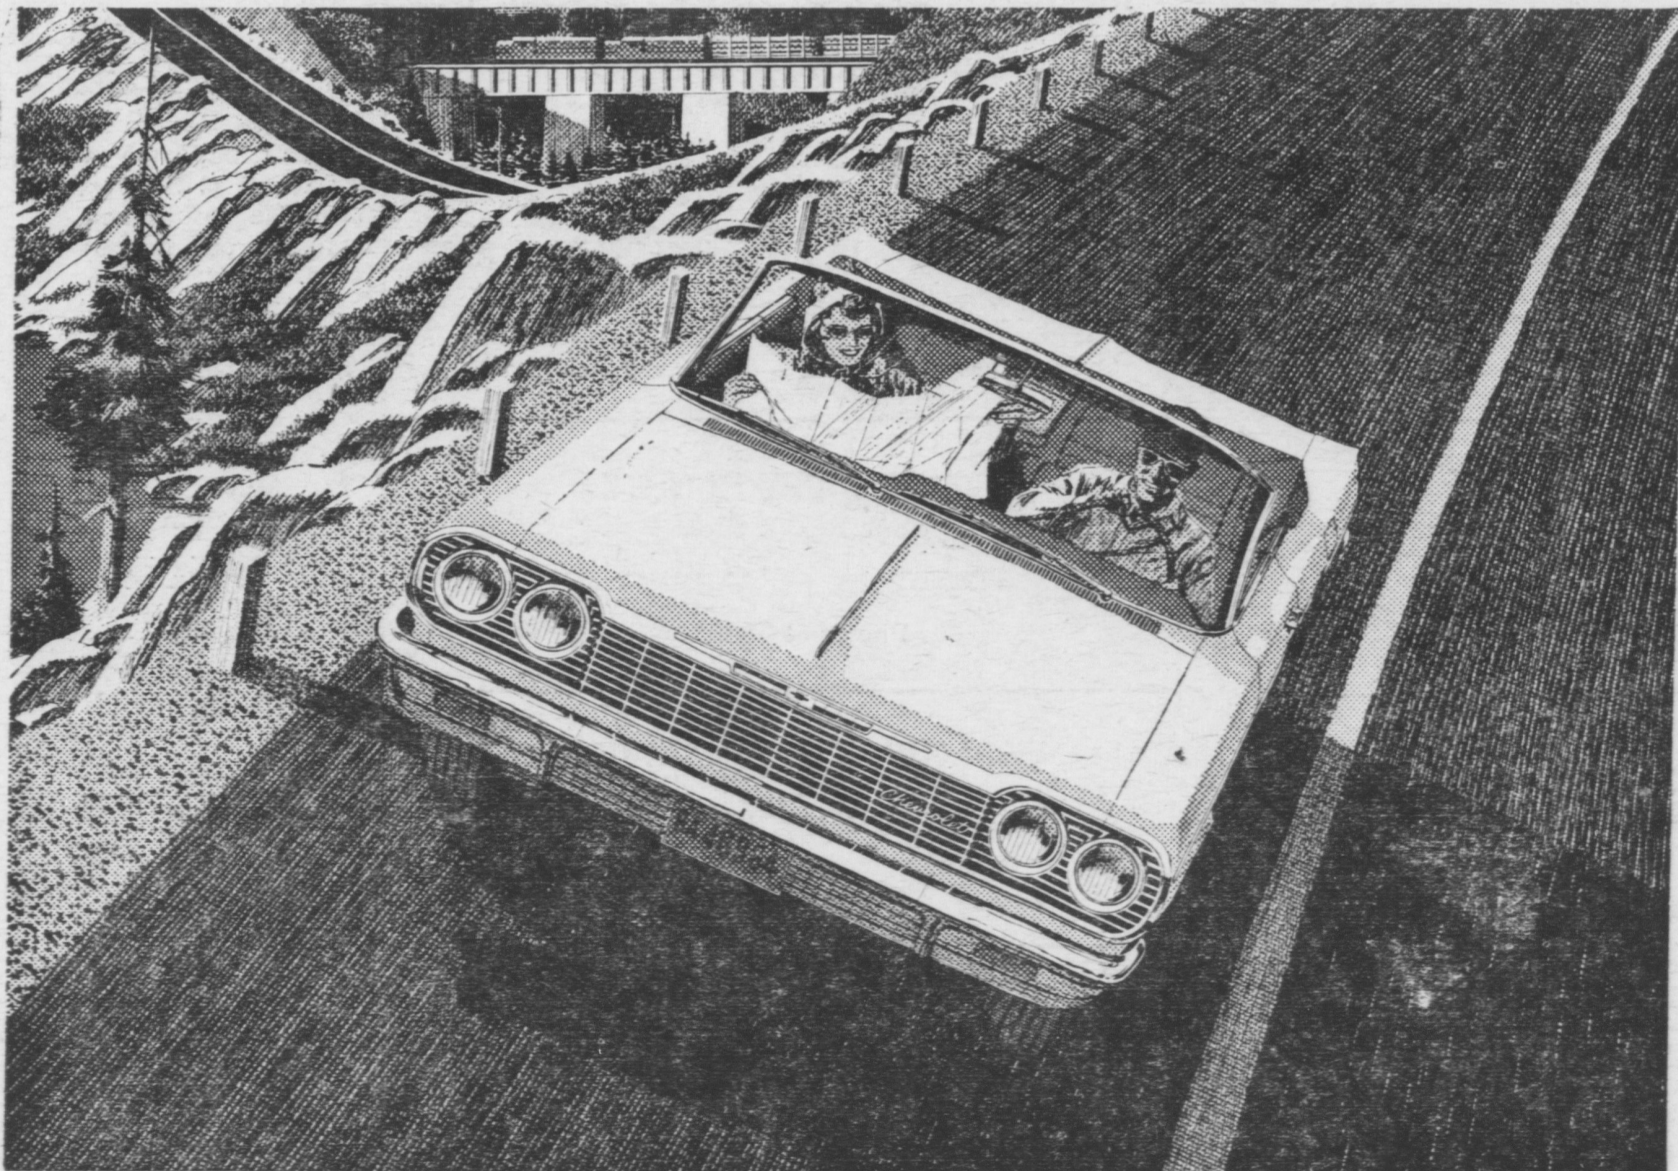

There's a lot of other Jet-smooth luxury, too. **FOR THE GREAT HIGHWAY PERFORMERS**

Wide seats with foam-cushioning front and rear. Luxurious wall-to-wall deep-twist carpeting (this year it comes with even the lowest priced Biscaynes). A choice of seven great engines, all precision-balanced for smoother running, with four smooth-shifting transmissions to match. Everything that makes Chevrolet the great highway performer it is.

So get out those road maps. And wherever you go, get off to a good start—during Trade 'N' Travel Time at your Chevrolet dealer's.
