

## Passing Thoughts For Drivers

Keystone Automobile Club offers some 'passing thoughts' to motorists.

"In passing," says Edward P. Curran, the Club's Safety Director, "it is the driver's responsibility to pass in complete safety and get back into line safely without confusing or endangering others."

It is safe to begin to cut back into line, he points out, when the driver can see in

the rear-view mirror the front of the car or vehicle just passed.

Advising motorists to allow plenty of time for passing the Keystone official also warned

"Do not pass near crests of hills.

"Do not pass on curves.

"Do not pass by weaving

FOR ATHLETE'S FOOT USE KERATOLYTIC ACTION

Because it sloughs off the infected skin. You see healthy skin replace it. Get quick-drying T-4-1 liquid, a keratolytic, at any drug store. If not pleased in 3 DAYS, your 48¢ back. Use antiseptic soothing T-4-L FOOT POWDER too—fine for sweaty feet, foot odor; stays active in the skin for hours. TODAY at SLOAN'S PHARMACY, Mount Joy. 11-4c

through traffic.

"Do not pass at or near intersections.

"Always give yourself and the other fellow plenty of time and space, and passing will be a pleasure — and not a peril."

### REUNION

The Somerset County reunion will be held Sunday, June 21, beginning with a picnic at 12 o'clock noon at the Civic Grounds in East Petersburg.

## Choose Plantings With Care

The type of tree that should be planted in the front and rear corners of a ranch house differs from those that should be planted around a two-story house. And certain shrubs should be planted beside driveways, walks or used as screens and border plantings. Properly used in a design, the correct trees and shrubs will feature the good points of a house and property and minimize its poorer qualities.

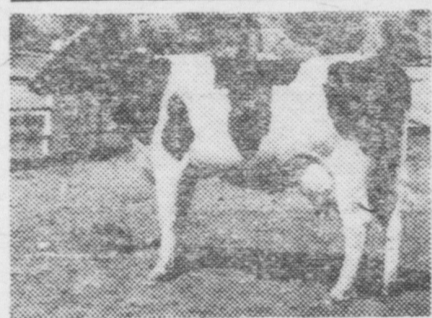

These and many other similar ideas will be taught at the annual "Improving the Home Grounds" Short Course of Penna. State University. The entire program will concentrate on home landscape design. Included in the instruction will be subject such as: selecting plant materials for residential planting, design procedures, basic concepts of design principles all taught from living specimens and in actual design laboratories.

The course will be offered the entire week of July 6th on the main campus of The Pennsylvania State University.

## SUMMER HEAT HARD ON FARM EQUIPMENT

While winter weather may be most damaging, summer heat also shortens the life of farm equipment, say extension agricultural engineers at Penn State University. As equipment becomes more "sophisticated" and expensive, the more it pays to keep it under cover when not in use.
