## Tasty Dish with Old-Time Flavor Tuna-Corn Country Casserole

Here's a wonderful tuna-corn casserole, easy as can be to make, and economical, too. Delectable morsels of convenient canned tuna provide hearty good taste and good nutrition, too. One serving of tuna provides more complete protein than a comparable serving of red meat. The casserole takes only minutes to prepare and then the oven does the work for you. The result—a marvelous dish with old-fashioned flavor reminiscent of Grandma's corn pudding, combined to a "T" with the delicate taste of the tuna. Tomato slices add a cheery note of color. Serve with a green salad and you'll have a meal to remember!

### Tuna-Corn Country Casserole

2 eggs  
1 can (10½ or 11 ounces) cream of mushroom soup, undiluted  
½ cup milk  
½ teaspoon Tabasco (optional)  
1 can (1 pound) cream-style corn  
2 cans (6½ or 7 ounces each) tuna in vegetable oil  
1 cup soft bread crumbs  
2 medium tomatoes, sliced  
½ teaspoon sugar  
½ teaspoon salt  
1 teaspoon butter or margarine

Beat eggs; stir in soup, milk and Tabasco. Mix in corn, tuna and bread crumbs. Turn into buttered shallow casserole 10x6x1½-inches. Bake in moderate oven (350°F.) 45 minutes; remove. Cut tomato slices in half; place around edge of casserole. Sprinkle tomato slices with sugar and salt; dot with butter. Return to oven and bake 15 minutes longer.  
YIELD: 6 servings.

### LABEL POISONS AND EXPLOSIVES

Keep them away from the children. It is often safer to destroy a little leftover poi-

son than to run the risk of children or animals getting to them before they are needed next season.

MARKET SQUARE  
MANHEIM, PA.

### FREEZE-DRIED FOOD. OUTLOOK

By 1970 freeze-dried foods can command a quarter-billion dollar share of the food market if production costs are cut by enlarging facilities and expanding markets, the U. S. Department of Agriculture reports. Freeze-drying adds to the regular costs of food freezing. For each pound of water taken out of the product the cost is now 7 to 17 cents. However, the extra cost could be brought down to 4 or 5 cents if full production is reached.

If your iris are too crowded, now is the time to divide them, says Lynn Smith, extension floriculturist at The Penn State University. Immediate transplanting brings the best results.

IT'S HERE!  
BRADY'S  
NEW, MODERN FLAIL-TYPE  
REAR END SPREADER

Pulverizes & Blanket-Spreads Any Material... Wet, Dry or Frozen... In Any Weather!

This is the one you've been waiting for... an efficient, trouble-free, economical spreader... that spreads every kind of material in every kind of weather! Heavy feed lot material or bulky dairy barn material or sloppy liquid material... it's all the same with a Brady Spreader. No chunks, no piles, no breakdowns, no rear-sentry duty, watching for rocks, cobs, or other foreign objects. Here's the "forward-looking" spreader that spreads from the rear—like a spreader should—in a smooth, wide, uniform pattern. Chain flails self-clean hopper after each load.

Over the fence loading, or in the feedlot or from the barn cleaner, the Brady handles all material.
