

RATS

Early fall is the time of year for rats to start seeking more comfortable homes. So clean up trash piles, stone piles and junk. Prevent rats from getting into food or feed by ratproofing buildings says Stan Gesell, extension

tomologist at Penn State University.

It is always the minority that holds the key to progress; it is always through those who are unafraid to be different that advance comes to human society.

Man has made some machines that can answer questions provided the facts are previously stored in them, but he will never be able to make a machine that will ask questions . . . The ability to ask the right questions is more than half the battle of finding the right answer.
—Tom Watson, Jr.

We may be returning to the epoch of primitive man and his pictures on cave walls, with our picture magazines, comic books, movie screens and television.
—Clifton Fadiman
