**Vandals Enter Paper Box Plant**

Vandals ransacked the Mount Joy Paper Box Co. offices Saturday night or early Sunday morning.

Police said entry was made through five broken windows. The only items missing are a watchman's time clock and keys to the firm's gas pump. Papers were thrown about and files disarranged.

The break was discovered Sunday morning by two employees of the firm.

**Sewer Digging Near End**

Work on the laying of the final main line of the new Florin area sewer system is progressing slowly but surely in the vicinity of the Cross Roads church.

Last week and early this week, workmen were hampered by rock but the anticipation was that the strata would run out soon and things would move more rapidly.

Because the line is just a few feet east of the front door of the church, it is being encased in concrete, further slowing the progress.

Workers and bystanders were interested to note that the excavation for the line, which is very deep, clearly indicated the old roadbed of the main highway as it formerly ran near the church before Angle street was improved and the roadway changed.

Meanwhile, work was started last week to permanently resurface of streets which were opened for ditching.

Weather, however, has not been favorable this week for blacktopping and oil tanks have been standing idle.

Too, workmen have been experiencing difficulties and

have been obliged to repeat preparation work in some instances. Huge tampers pound stone into the top of the prepared ditch, ready for oil and macadam.

However, motorists later have been driving through the stones. Small tires and wheels "chew up" the surface and make it necessary to repack and prepare again.

**Zing into spring! Chevrolet Impala**

**People who buy other big expensive-looking cars get one thing you won't (big expensive-looking payments)**

It looks like a big car. And is—by almost any standard you want to apply.

Width? Nobody builds a car as much as one inch wider. Length? It grew three inches this year. Roominess? Every closed model's got three inches more shoulder room, front and rear, and more leg and foot room up front too. Luxury? Nice little touches like the look of mellow walnut across the Impala's instrument panel. And big touches. Like the fineness of the same Body by Fisher workmanship that makes some of America's most

expensive cars look so expensive. How about the ride? Chevrolet engineers took the Jet-smooth one and smoothed it out even more this year. Also made it more stable by widening the wheel stance. Price? That's where Chevrolets fall way short of the other big expensive-looking cars. But we wouldn't have it any other way. Would you?

One last question: How soon can you make a good spring buy on a Chevrolet? One last answer: Just as soon as you can get down to your Chevrolet dealer's.
