## How did that living room get into the basement?

Easy! . . . you simply remove that old-fashioned, flame-type furnace from the area, then install electric baseboard, electric ceiling cable or electric warm air heating. Suddenly, your whole basement is yours again . . . ready for use as an added living room, play room, workshop, whatever you need.

If you're thinking of adding a room, see your Reddy Kilowatt Recommended Electric Home Heating dealer. Chances are good he'll find the room's already there — in your basement.
