Cabinet Improves

Home Laundry

By having a cabinet built around stationary tubs, you can improve both the appearance and storage facilities of your home laundry.

This home improvement project is a cinch even for the amateur craftsman.

Roomy drawers and a splinter-free top, which is ideal for sprinkling clothes or sorting laundry, are good planning. Materials needed are readily-available, including grainless hardboard which is easily kept clean and won't snag garments, and light lumber for framing.
