P.P.&L. Offering 23 Scholarships

Pennsylvania Power and Light company President Jack K. Busby has announced that PP&L is offering 23 scholarships to high school seniors graduating in the spring of 1967. The scholarships are available at twenty-one colleges and universities in Central Eastern Pennsylvania to students whose parents reside in the company's service area.

"The rapid technological advancements in this country," Busby said, "are continually increasing the demand for larger numbers of better trained leaders. It is these people who provide the leadership so vital in developing an ever-improving society. As opportunities have expanded in recent years, the cost of obtaining a college education has increased, making it a prohibitive factor for a growing number of potential students. PP&L offers these students an opportunity to compete for scholarships under its program of aid to higher education."

Company shareowners have granted the directors the authority to make reasonable expenditures for aid to education, Busby explained, and for the support of worthwhile civic and charitable activities. These contributions in no way affect the price of electric service to customers, he explained, since they are made from the earnings available to pay shareowners a return on their investments.

Each of the 21 colleges and universities is responsible for selecting from among all the applicants the recipient of a PP&L scholarship. There fore, an applicant is eligible to compete for scholarships only at those institutions, participating in the P P & L program, to which he or she has been admitted. Of course, a high school senior may apply to more than one service area college for a PP&L scholarship.

College and university officials will consider scholastic ability and financial need, as well as other criteria
