Prayer Of The Week

The prayer this week is by Simon Patrick:

"Almighty and most merciful Father, in whom we live and move and have our being, to whose tender compassion we owe our safety in days past, together with all the comforts of this present life, and the hopes of that which is to come; we praise Thee, O God, our Creator; unto Thee do we give thanks, O God, our exceeding Joy, who daily pourest Thy benefits upon us.

"Grant, we beseech Thee, that Jesus our Lord, the Hope of glory, may be formed in us, in all humility, meekness, patience, contentedness, and absolute surrender of our souls and bodies to Thy holy will and pleasure. Leave us not, nor forsake us, O Father, but conduct us safe through all changes of our condition here, in an unchangeable love to Thee, and in holy tranquility of mind in Thy love to us, till we come to dwell with Thee, and rejoice in Thee forever. Amen."

It is the largest single capital expenditure ever made by Armstrong Cork company.

Basic Material

Already the basic material -mineral wool, a product made from steel mill slag, similar to the well-known fiber used for insulating-is being readied for shipment from Birmingham, Ala. Within a few days a ship will dock at Baltimore and another basic ingredient-starchwill arrive from Thailand.

Production workers will be exclusively men in the plant, which actually is highly automated.

Heart of the manufacturing plant is a tremendous, specially built machine from Scotland which in effect is a paper manufacturing behemoth.

Fed into it will be wool fiber, plus the starch and "dabs of this and dabs of that" which manager Betty was not inclined to identify. Using large quantities of water from its own on-site wells, the material is formed into sheets 5% inch thick. Made in a continuing flat sheet, water jets and saws reduce the material step by step, pass it through a tremendous drying oven and
