REMINDER

A yearly physical checkup is a special safeguard against cancer. The American Cancer Society reminds everyone that it is what you don't know about cancer that can hurt you.

The "Hootchy-Kootchy" was first danced in Chicago, at the 'Columbian Exposition' of 1893.

Undersized battery cables on the family auto can cause poor starting. Some manufacturers put less wire in the cable and conceal it by adding thicker than necessary insulation. If the battery strength is up and it there are no broken cables, corrosion, or loose terminals, it's almost certain thin cables are not carrying enough current to turn the motor over.

An experimental car developed in Japan runs on a zinc and air fueled battery. The battery weighs almost 600 lbs. and will power the car for 5 hours while traveling at almost 25 miles per hour.
