white becomes somewhat tough and the yolk, mealy.

Mrs. Buck recommends this method for hard-cooking eggs: Put eggs in a pan and cover completely with cold water. Heat to simmering temperature and cook 20 to 25 minutes. Do not let the water boil. Plunge the cooked eggs at once into cold running water and leave until cold.

The green discoloration that sometimes appears between the white and yolk of a hard-cooked egg results from a chemical reaction between sulfur in the white and iron in the yolk. This discoloration is harmless, according to Mrs. Buck, but unattractive. To help prevent the problem, cook eggs at low temperatures avoid overcooking and cool eggs promptly.

If hard-cooked eggs are difficult to peel, they may be

### BE AN EARLY BIRD

The American Cancer Society wants to spread the word that early detection and prompt treatment can save many lives from cancer. Help the American Cancer Society fight cancer with your check and have a checkup yourself.

### HARD COOK, NOT HARD BOIL EGGS FOR BEST RESULTS

Your Easter egg treats will have both eye-appeal and taste-appeal if you cook the eggs properly. Mrs. Ruth J. Buck, Extension foods and nutrition specialist at Penn State, reminds you that eggs

should be hard-cooked, not hard-boiled. The texture of eggs cooked in the shell is affected by heat. When eggs are cooked at simmering temperatures, below the boiling point of water, the white will be firm but tender and the yolk smooth. Cooked at the boiling point of water, the

### SPATULA HELPS

A rubber spatula — sometimes called a plate scraper — will help you remove every last bit of batter from a bowl. These spatulas come in two widths; use the wide width for the folding process in making a cake.
