The bride-elect was graduated from Donegal high school and is employed by Donegal Mutual Insurance Co., Marietta.

Mr. Wetzel is the son of Mr. and Mrs. Lewis M. Wetzel, 34 New Haven St.

He was graduated from Donegal high school and is serving in the U.S. Navy aboard the U.S.S. Farragut in Philadelphia.

★ **WEDDINGS**

SMEAL—KULP

The marriage of Miss Deborah Kay Kulp to Robert Duane Smeal took place Saturday, Nov. 17, at the Mount Joy Church of God with the Rev. Ralph Warner officiating.

The bride is the daughter of

Mr. and Mrs. J. Russell Kulp, 314 Birchland Ave. She was graduated from Donegal high school and the Lancaster Practical Nursing school, Willow Street. She is employed by Lehman's Nursing home, Rheems.

The bridegroom is the son of Mr. and Mrs. Roy Smeal of Bainbridge R1. He was graduated from Elizabethtown high school. He is employed by Armstrong Cork Co., Marietta carpet plant.

Given in marriage by her father, the bride wore a floor-length gown of organza accented with Alencon lace.

Mrs. Nancy Heistand of Elizabethtown R3 was matron of honor. Bridesmaids were: Michele Kulp, sister of the bride; Amy Kulp, sister of the bride; Elaine Loraw, Mount Joy, and Kathy Smeal, sister of the bridegroom.

Flower girl was Nancy Ann Zimmerman, Akron. Kevin Smeal, brother of the bridegroom, was ringbearer.

Serving as best man was

Steven Heistand of Elizabethtown. Ushers were: Martin English, Mount Joy; Rodger Smeal, brother of the bridegroom; Gary Neideigh, Elizabethtown, and Jerry Wetzel, Mount Joy.

Following the ceremony, a reception was held at the Myer Dining Hall, Elizabethtown college. The couple will live at Elizabethtown R1.

HUBER—HITZ

The marriage of Miss Dorothy D. Hitz to Dale S. Huber took place Saturday, Nov. 17, at 6 p.m. at the Reich's Evangelical Congregational Church with the Rev. Ray Berrian and the Rev. Thomas Bellis officiating.

The bride is the daughter of Mr. and Mrs. Victor W. Hitz, Mount Joy, R1. She was graduated from Donegal High school and Elizabethtown college. She is employed by Hempfield school district as a business education teacher.

The bridegroom is the son of Mr. and Mrs. P. Elmer Huber, 523 Pine Hill Road, Lititz. He was

graduated from Warwick high school and East Stroudsburg State college. He is employed by Parkland school district, Orefield, as an elementary physical education teacher.

Given in marriage by her father, the bride wore a floor-length gown of sata peau trimmed with peau d'ange lace.

Mrs. Sylvia Gerber of New Holland was matron of honor. Bridesmaids were Mrs. Carole Shetter, Mount Joy, and Mrs. Patricia Tate, Elizabethtown. Flower girls were Miss Jennifer Lynn Gerber, New Holland, and Miss Stacy Jo Shetter, Mount Joy. Gregory Roberts of Mount Joy was ringbearer.

Serving as best man was Elmer S. Huber, brother of the bridegroom, Lititz. Ushers were Larry S. Huber, Lititz, and Ray S. Huber, Lititz, brothers of the bridegroom.

Following the ceremony, a reception was held at Hostetter's Banquet Hall. The couple will live in Lebanon.

PLAN HOME-HEATING SAVINGS NOW

Looking for ways to cut household operating expenses? Trimming heating costs is probably the most important single thing you can do. What's more, there's no better time than now to prepare your home and heating system for winter.

Here are some ideas. They not only can result in year-after-year savings, but make your home more comfortable, too.

Are you sure you have enough insulation?—Adequate insulation in your home can reduce heating costs by as much as one-third. Even in homes thought adequately insulated a few years ago, some additional insulation, particularly in the ceiling, may produce substantial savings. And, as shown below, it's an investment that pays for itself quickly.

ANNUAL DOLLAR SAVINGS WITH THE ADDITION OF ATTIC INSULATION

(Based on 1,000 square-feet of attic space and a fossil-fuel heating system)

		IF YOU HAVE—		
		NO Insulation	2½"	4"
AND YOU ADD THIS— You'll Save . . .	2½"	\$98	\$13	\$7
	4"	\$107	\$19	\$10
	6"	\$113	\$23	Over 8½" not Practical

APPROXIMATE COST OF INSULATING MATERIAL
(Dollars per 1,000 square-feet)

2½"	4"	6"
\$70	\$90	\$160

In addition to reducing fuel bills with a well insulated home, you can also reduce your electric bill. Don't forget, electricity runs the blowers or pumps common to most all heating systems. When they don't have to work as hard or operate as long, you're saving both energy and maintenance costs.

Storm windows and doors can cut in half heat losses through existing single glass windows. If any glass panes are broken, now's the time to fix them. If you don't already have storm windows and doors, an investment in them should pay for itself in less than 10 years.

Caulking and weatherstripping— Seal around doors and windows while the weather is pleasant. Remember attic doors, too. A ¼" crack under a 3-foot door loses heat through 9 square inches. Believe-it-or-not, just this small space can cost you several dollars each winter.

HEATING SYSTEM EFFICIENCY TIPS

Warm air heating system filters should be clean for good heat circulation. Clean or replace dirty filters at least once a month during the heating season.

Blower motors on warm-air heaters or circulators on hot water systems should be given a couple of drops of oil unless the motors are the newer, permanently sealed and lubricated types. Be careful not to over-oil and use only the "oil" lubrication holes. Refer to the manufacturer's instructions.

Belts should be checked on warm-air system blowers and adjusted if needed.

Heating ducts in unheated areas such as attics and crawl spaces should be examined for leaks and insulated with at least one inch of insulation.

Vents in attics or crawl spaces should be open. Don't block them: your home could suffer damaging condensation.

Clean registers, baseboard units or radiators. A thin layer of dust can impair heat radiating ability . . . vacuum cleaning can eliminate the problem.

Call your serviceman early for any burner cleaning or tune-up work needed.

Set thermostats bearing in mind you can reduce heating costs by about 3% for each degree you can lower the setting. Adjust or turn heat off in rooms you don't regularly use.

Remove furniture or obstacles from in front of heating outlets.

Each of these tips can make a difference in dollars to you. You can also add comfort to your home and assure better performance of your heating system as well. Moreover, you'll be performing another service. You'll be conserving fuel and helping our nation achieve energy conservation goals.

Plan for tomorrow . . . start saving now!
