spot for connection with the existing system.

These things are going to take some time, of course, but the Borough Authority is "pushing". Maybe 14 months!

An interesting sidelight was made clear at last week's borough council meeting. When there is talk in official circles about curfew, the subject of age limits are very much part of the discussion!

It needs to be understood that when these people say "17-year-old age limit" they mean that the curfew applies to all persons who are 17 years of age and under. A youngster would not be exempted until he reached his 18th birthday.
