5 more ways to Save on your phone bill (Part 2)

6. Are you going to be away from your home for an extended period of time? Based on how long you will be away, our business office representative can determine if you can save money by temporarily suspending your phone service.

7. Did you just get a wrong number when you dialed a long distance number? Don't hang up and grumble about it. Ask the answering party the area code and the number you reached in error. Then call the operator and tell her what happened. The operator will remove the charges.

8. Did you get cut off from your party in the middle of your conversation? Did you have a noisy connection? Don't just hang up and call back. The calling party should call the operator and report the problem. The operator will credit you for the time your call was interrupted.

9. Did you get charged for a long distance call you never made? Call your United Telephone business office and our representative will have the charge removed.

10. Dial your own long distance numbers direct. That's the cheapest way. Of course, you may not reach the person you wanted on the first call, but you could probably make two or three station-to-station calls for the price of one person-to-person call.

This advertisement is another in a series of helpful and cost saving tips from your United Telephone Company to help you save money. (And everyone knows saving money is not easy these days).
