Your house actually stretches and shrinks with variations in temperature and humidity. It's this expansion and contraction that often causes house paint to work loose, crack and peel.

Pittsburgh Paints new Sun-Proof® Latex House Paint stretches and shrinks with your house... this flexibility enables it to resist the cracking that ruptures an otherwise sound paint film. It has more stretch power than other latex paints, and it resists fume staining and discoloration. Available in a wide choice of attractive outdoor colors. Come in today for a free color chart.
