Shireman, treasurer and Mrs. J. Edw. Charles. coordinator. The 1976 annual dinner meeting will be held Sat., June 5.

## Don't squash that bug: even flies need love

Drawing and story by J. L. Biesecker

Don't squash that bug flitting about your porch light; it could be an important friend of yours, especially if you are a fisherman. Many fishermen catch fish and do little to repay Mother Nature for her efforts in their behalf. There are many things that we can do to help improve the quality of our fishing streams, if we just take the

These efforts do not have to be the great dramatic and newsworthy efforts of environmental groups. Often, the small act can be as important. For example, you can protect and assist the Dobson fly.

Dobson flies are the mature stage of the hellgrammite. Last week we spoke of how much smallmouth bass love these little creatures that live under rocks in streams. In recent years the population of hellgrammites has continued to decline. These insects are easily affected by pollution, and they have been hurt by the spread of recreational homes and facilities.

Adult hellgrammites leave the water, pupate for about two weeks and emerge as Dobson flies. As with many other insecfts, Dobson flies are attracted to outdoor lights and windows. They often exhaust or injure themselves in the witless fluttering about lights at cabins and homes near streams. Such self destructive activity keeps many Dobson flies from achieving the main purpose of their existence as adults, to lay their eggs in streams, perpetuating the cycle of new life.

When you find one of those rather fierce looking insects around your window or light, gently capture it and return it to the water's edge. This will aid the increase of the next generation of hellgrammites. contribute significantly to the food chain in your favorite trout or bass stream and will help remind you that little things are valuable-often with much greater importance than we realize.

Former teachers: Albert Dettinger, Mary Rettew Hicks,

Ralph Coleman, John Buch, Amos Krebs, Phyllis Dissinger

Class of 1925, 1st row: Esther Bucher, Ruth Shellenberger, Art Zuch, Kitty Miller, May Rettew; 2nd row: Kathryn McElroy, Edith Lilly, Erma Hank, Fay Siple.

Class of 1925: Ruth Shellenberger Wagner, Kathryn Finefrock (Miller), Arthur Zuch, Kathryn McElroy Etzel, May Rettew Hicks

Class of 1950: Jean Reuter Seachrist, Josie Neale Long, Kathryn Smith Tucker, Robert Carroll.
