Marine Corps Base, Camp Pendleton, Calif.

A former Student of the University of Massachusetts, Amherst, Mass., he joined the Marine Corps in March 1975.

**Kline suggests pre-winter auto check-ups for safety & economy**

Referring to today's high cost of owning and operating an automobile, Mount Joy Borough Police Chief, J. Bruce Kline, today offered a series of pre-winter vehicle-check suggestions that he believes will save all motorists time, trouble, and most of all—money!

As an example, the chief pointed out the increase in importance of annual winter tune-ups in terms of increased fuel economy. Nothing should be overlooked, in his opinion, from the radiator to the tailpipe—complete safety servicing by a mechanic at a reputable service station or garage.

Other items that should be safety serviced by a mechanic for dependable

ing Hazards and endorsed by the International Association of Chiefs of Police:

Safety equipment checks should include tires for good treads. Better yet, equip your car with snow tires or with studded tires (where Legal) for added traction advantage.

Windshield wiper blades should wipe clear—meaning live rubber in the blades and adequate arm pressures. The heat-defroster should

for sidewall damage. Citing tests by the United States Auto Club in which chains were driven at a sustained speed of 35 miles an hour on dry, bare pavement, the chief said that the USAC report concluded that even under this exceptionally rigorous test condition there was no sidewall or tread gouging on any of the radials tested, even after 150 miles of this

severe punishment.

"We know the safety and economic aspects of checks such as these of all our department and emergency vehicles," Chief Kline emphasized. "I hope all Mount Joy area drivers will use them too—as their best defense against winter's stalling tactics!"

put out enough warm air to keep the windshield and side and rear windows free of frost and ice. All lights should be checked for proper operation, cracked or broken lenses replaced and kept clear of caked snow or slush off the roadway.

Emergency equipment should be stowed in your trunk and ready when the

time comes. This should include booster cables, shovel, tow chain, flares, traction mat, sand or rock salt and reinforced tire chains. Check chains before they're needed to be sure they're still sound; replace broken links.

And despite rumors to the contrary, Chief Kline said, tire chains can be used with radial tires without concern

**Cub Pack 136 roller skates**

by Robert W. Mark
