SUGGESTS

10 WAYS

you can save

10 WAYS TO SAVE ON FUEL AND WATER

1. Have your present burner thoroughly **CLEANED AND ADJUSTED** for maximum efficiency. \$\$\$\$\$
2. Install a very economical **COLUMBIA OIL BURNER**. \$\$\$\$\$
3. Install a **HEAT RECLAIMER** blower in your flue pipe. \$\$\$\$\$
4. Install a **CLOCK THERMOSTAT**. It automatically lowers the thermostat setting when you retire and then re-sets it before you arise. \$\$\$\$\$
5. **INSULATE** water and heat pipes. \$\$\$\$\$
6. A **HUMIDIFIER** will save you fuel. With higher humidity in your house, you definitely can lower the thermostat setting and have the same feeling of warmth. Ask us to explain it to you. Models for hot air, hot water and electric heating systems. \$\$\$\$\$
7. Save up to 1/3 water, in each flush, with a **WATER SAVER TOILET**. From \$54.50 to \$78.50. \$\$\$\$\$
8. Replace your smaller electric hot water heater with an **80 GALLON, LOW RECOVERY ELECTRIC HOT WATER HEATER**. [Don't take our word for it, check with your electric company.] \$\$\$\$\$
9. **REPLACE HOT WATER PIPES THAT ARE TOO LARGE** with smaller ones to avoid excessive water drawn to the sink, etc., before the hot water arrives. \$\$\$\$\$
10. Install a **VOLUME ADJUSTING FITTING** on your shower head. \$\$\$\$\$
