## Greasing Axles.

On the nuthority of the Carriage
Monthily, more injury is ione tocarringes and wngons by greasing too much than the reverse. Tallow is the best labricant
for wood axles, and enstor oll for iron. for wood axles, and eastor oll for fron.
Lard and common grease are apt to penetrate the hat, and work their way out around the tenons of the spokes and spoll the wheel. For common wood axles, Just enough grense should be ap-
plied to the spindle to give it a llght plied to the spindle to give it a light
coating. To oll an Iron axle, firet wive coating. To oll an lron axle, first wipe
clean with a cloth wet with furpentine. and then apply a few drops of castor ofl near the ehoulder, and end. One teaspoonfal is enough for the four wheels. Carringes are sometimes oiled so much
that their appearance is spolled by that their appearance is spolled by
having the grease spattered upon their varnished surfaces. When they are varnished surfaces, When they are
washed in that oondition, the grease Is
sure to be transferred to the clamols sure to be transferred to the chamo
from the wheels, nud from thence on to
the panels.

To Remove Grease from Cloth. Grease may be removed from cloth by means of a little soft or curd soap dis.
golved in water and mixed with oxgall. The spots of grease or dirt must tirst be touched with the liquid all over, and then well rubbed with a stiff brush until they are removed; after which
they may be well rubled all a brush or sponge dipped Into some a brush or sponge dipped into some
warm water, to which the previous mixture and a little more oxgall have properly done It remains to rinse the article thoroughly in clean water until the latter passes off uncolored, when
the garment should be hung up to dry. practice s to add some fuller's earth to the mixture of soap and pall. When
nearly dry, the nap should be laid right, and the article carefully pressed; atter
which a brush molstened with a drop or two of olive oil should be several
timees passed over it, which will give it to Sweet-Breads, which people are
elther very fond of or enn't to be cooked in this way, according to Mrs. H. W. Beelher, who is a notable
housewife: Stewed-Wash, remove all the bits of skin, soak in salt and water an hour, then parboil; when half cook-
ed take from the fire, cut in small pleces, stew in a little water till tender; add a pleaspoonful of flour, and boil up once Serve on toast very hot. Fried-after lying in salt and water put them into
cold water a ew minutes, then dry on a cloth thoroughly, fry them with little strips of ealt pork or dip in beaten egg
nad roll in bread crumbs, and fry in hot lard; or draw ittle strips of sait pork
through the sweet-bread with a larding needle, fry till the pork is orisp then dip pour over hatf a cup of rich creamb Ti one teaspoonful of flour and let it
boil up for few minutes, and serve hot
Broiled Parboil after and water, then rub well with butter
and broil. Turn often, and dip in meited butter to prevent
coming hard and dry.

## Frosted Rice Pudding.

One cup of rice boiled in one pint
water until dry, then add water until dry, then add one pint of
milk and boil again. Add the juice and mrik and boil agnin. Add the juice and four eggs, and one-half cup of sugar. Stir well together and bake slowly for one hour. Beat the our whites of the
eggs to a stiff froth and add one cap of eggs to a stiff froth and add one cup of
powdered sugar ; spread on the pudding and brown lightly. -.

Take cold roast lamb or mution ; throw away the fat portons; chop very
fine, and add water enough to make it fine, and add water enough to make it
quite thin; boil in a frying-pau; add quite thin; boin in a reylag-pait ; add have ready hot toast which hus been well buttered and dipped into cream or rich milk, and spread the hash over the toast, and serve immediately.
Bone Meal for Grapes.

The editor of the London Horticulturis Asserts that among all the fertilizers
proposed for the grape, none embody more of the necessary ingredients than
bone ineal. It should be bone imeal. It should be npplled as
early in the season as possible. early in the season as possible. About a ton to the acre makes a dresning that
will prove valuable for two or three years.

Summer Mince Pie.
Four erackers, one and one-halt culs of sugar, one cup of molasses, one cup
of cider, two-thirds of a cup of butter, one cap of elopped mishs, ove-lalf cup of currants, two egge well beaten and stirred lu, the last thing; aplee to the tunte.
