was swindled:

I was in the city on the 8th of April; was on Fourth street, near Walnut, when a young man stepped up to me and named me. I told him he was mistaken, that I did not know him. He said his name was Pomeroy, a son of Major Pomeroy, and that he used to live at Port Royal when a boy. He said he was engaged in traveling and advertising California tea, and asked me if I would take a small package as a sample to W. C. Pomeroy, cashier of the Port Royal Bank. I told him I would. He said his satchel was at a ticket office where they sold through Western tickets, on Locust street, a few doors to the right of Fourth street. I went with him. In the room was a man behind a stand. At the other end of the room was a large table, covered with railroad guides and time tables, and two chairs. Mr. Pomeroy asked me to take a seat while he would show me his samples. I did so, and smelled the tea. It was the last I knew or was conscious of. while he would show me his samples. I did so, and smelled the tea. It was the last I knew or was conscious of. They took \$100 in cash from me, opened the door, took me out on Fourth street (that is, Pomeroy did) and let me go. I came to my senses, found my way to the hotel, on the corner of Fourth and Vine streets. I said nothing, but went back to Walnut street and complained to a detective (whose card I enclose to you). He charged me \$10 cash to hunt the case up. I came home and saw W. C. Pomeroy, who said I was the second person who had come to him that this party had accosted I wish to say, to make it plain, that before I smelled the ea there was an old man, tall, rather stooped, with a thinnish, peaked nose, who came in and asked for a ticket for Kentucky. They told him to take a seat, that the agent would be in in a minute. The money was handed to the old man. I think there should be some way to find this party. It was between three and four o'clock in the afternoon. Mr. Editor, I am not a drinking man, can swear I did not drink anything three and four o'clock in the afternoon.

there should be a way to discover these
