The Bloomfield Cimes.

HOUSE, FARM AND GARDEN.

Fowls in Orehards.

Last week we visited an orchard in which fowls were kept, the owner of which told us that before the fowls were confined in it the trees made little or no growth, and only a corresponding amount of fruit was obtained. But what a change was evident now! The grass was kept down, the weeds killed, and the trees presented an appearance of thrift, which the most enthusiastic horticulturist could not but admire and envy. The growth of the trees was most vigorous, and the foliage remarkably luxuriant; the fruit was abundant, of large size and free from worms and other imperfections. The excellence was accounted for by the proprietor, who remarked that the "hens ate all the worms and curculio within their reach, even the canker-worm." He found less trouble with their roosting in trees than he expected, and that a picket fence six feet high kept them within bounds,-His orchard was divded into three sections, and the fowls were changed from one to another, as the condition of the fowls or the orchard sections seemed to

Cider Wine.

To three gallons of new, unfermented cider, add nine pounds of sugar; dissolve the sugar by stirring it well. Put it into a sweet keg, and let it stand four weeks; then strain it through a cloth strainer, and put it either into bottles or jugs; cork tightly, and it will keep for any length of time, as age improves it .-Every housekeeper knows what a luxu ry and convenience a pure, unadulterat. ed wine is in a family, either for cooking purposes or medicinal uses.

Tree Planting.

Failures in tree planting too often arise from the mistaken notion that when the roots of a tree are once in the ground the work is done. After a tree is carefully planted it should be mulched with leaves, straw, tan or any similar material, not so thick as to exclude the air, but sufficiently to retain the moisture in the soil; for, although there may be plenty of rain early in the season, the chances are that a drought more or less severe will follow.

Tomato Omelet.

Peel a couple of tomatoes, which split in four pieces; remove the seeds and cut them into small pieces; then fry them with a little butter until nearly done, adding salt and pepper. Beat the eggs and mix the tomatoes with them, and make the omelet as usual.

Gumbo.

Take a nice fat hen or two chickens, cut up and put into a pot to fry; when it is fried brown, not scorched, put in two quarts of finely sliced okra (the white is preferable), four large tomatoes and two onions, peeled and chopped fine. Keep covered with water, and have the kettle tightly closed.

Boiling Beef.

Beef that has a tendency to be tough can be made very palatable by stewing gently for two hours with pepper and salt, taking out about a pint of the liquor when half done and letting the rest boil into the meat. Brown the meat in the pot. After taking up make a gravy of the pint of liquor.

Time slacked with a solution of salt in water and then properly thinned with skim-milk, from which all the eream has been taken, makes a permanent whitewash for out-door work, and it is said renders the wood incombustible. It is an excellent way for preserving shingles and all farm buildings.

In the last fifteen years the production of wheat and barley in the United States has trebled, corn, cotton and tobacco, more than doubled, oats increased nearly 140,000,000 bushels, potatoes nearly doubled and hay increased more than one-third.

Rice Cakes.

Boil rice until it is son, and while carm make it into cakes or flat balls.— Dip the balls into a beaten egg, and then roll them in Indian meal till thoroughly coated. This done, fry them in lard, which is better than butter for this purpose. Serve them with sauce, or with butter, or with cream and sugar.

A Blg Success.

"My wife had been ailing along time with dyspepsia and nervousness and was in bed two years with a complication of disorders her physicians could not cure, when I was led by reading a circular left at my door to try Parker's Ginger Tonic. Having been so often deceived by worthless mixtures, nothing but my wife's dangerous condition could have led us to make any more experiments. But it was a big success.—Three bottles cured her, at a cost of a dollar and fifty cents, and she is 'now as well as any woman, and regularly does her household duties.—23, 4t.

PERFECTLY SAFE IN THE MOST INEXPERIENCED HANDS!

For Diarrhoea, Dysentery, Cramps, Cholera,
AND ALL THOSE NUMEROUS TROUBLES OF THE STOMACH AND SOWELS
SO PREVALENT AT THIS SEASON,
Me Remedy known to the Medical Profession has been in use so long and with such uniformly
satisfactory results as

PERRY DAVIS

PAIN KILLER

AN UNFAILING CURE FOR ALL SUMMER COMPLAINTS

such it really is when taken in time and according to the very plain directly and diseases, the ottack to result. ceases, the attack is usually sudden and frequently very acute; but with a r at hand for immediate use, there is seldom danger of the fatal result

In such diseases, the attack is usually sudden and frequently very acute; but with a safe remedy at hand for immediate use, there is seldom danger of the fatal result which so often follows a few days neglect.

The inclination to wait and see if the morrow does not bring a better feeling, not infrequently occasions a vast amount of needless suffering, and sometimes costs a life. A timely dose of Pain Killer will almost invariably save both, and with them the attendant doctor's fee.

It has stood the test of forty years' constant use in all countries and climates, and is perfectly safe in any person's bands.

At is recommended by Physicians, Numes in Hospitals, and persons of all classes and professions who have had opportunity for observing the wonderful results which have always followed its use.

THE BEST EVIDENCE:

I have long used the medicine known as PERRY DAVIS & SON:

I have long used the medicine known as PERRY DAVIS VEGETABLE PAIN KILLES if my family and would not on any account be without it. When Cholera was last epidemic here, I used no medicine of any sort but the Fain Killes, and although myself and several members of my family were attacked as exercively, I am happy to say that the Pain Killer was equal to every emergency. I consider I should not be doing my duty to the community did I not say this much. If I were attacked by the Cholera to day, Fain Killer would be the only remedy i should use. I have thoroughly tested it, and know it can be relied on.

F. E. BERGINSEND, Galena, Illinois.

No family can afford to be without it, and its price brings it without it. Feeling myself under much obligation to you, in many times being relieved from pain I am very truly years.

L.F. MOORE, Bangall, Dutchess Ce, New York.

The use of one bottle will go forther to convince you of its merits than columns of newspaper advertising. Try it, and you will never do without it.

A NEW DEPARTURE!

THE SYRACUSE CHILLED PLOW CO. of Syracuse, N. Y.

Are now putting on the market a Plow that

is as much superior to any Plow heretofore made as the Plows of the past few years have been superior to those made half a century It combines all the excellencies of any Plow

It obviates all the objections made to any other Plew.

In addition it embraces several new features of the greatest value, for which we have ob-

Its Beam, Clevis, Jointer Standard and Wheel Standard will be STREL, and its moid board will be a composition of Steel and Iron chilled under a process for which we have also obtained an exclusive Patent. It will be called

THE SYRACUSE CHILLED STEEL PLOW

Its weight will be eighteen pounds less than our present styles.

A first-class Steel Plow, made in the or-

dinary way, full rigged, retails for twenty-two dollars. Inferior Steel Plows retail from six-

teen to nineteen dollars.

The price of our new Plow will be but Seventeen Dollars, and it will be the cheapest Agricultural Implement over sold.

Its mold board will outwear three of the very best kinds of the ordinary steel mold

It will scour in soils where all steel plows and all other plows have hitherto proved a

With this Plow will be introduced a corru gated Plow Point and Jointer Point, on which we have also obtained a Patent, and which is also a great improvement, both as regards strength and wear.

The Jointer can be shifted so as to take nore or less land, and also more or less pitch and it can always be kept on a line with the

The wheel will run under the beam or one side of it as desired, and always kept in line.

The beam is adjustable for Spring or Fall

Plowing, and also for two or three horses.
The handles can be adjusted to accommodate a man or boy, on the same Plow.
It is a perfect Plow.
Wooden beams are going out of use because

they shrink, swell and warp, and never run

Iron beams are too heavy.

Malicable beams become demoralized and bend, which is much worse than to break. A Steel beam is the necessity of the day. It is three times as strong and very much lighter

than any other style. When we say a Mold board is chilled, the farmers know it is so.

We do not pain off on them a composition of various metals and call it chilled metal. We want agents for this new Plow in every

town in this State.

We can give but a very small discount to them, but we will pay the Railroad Freight.
We propose to place this Plow in the hands
of Farmers as near the cost of manufacture

It will be the best Agricultural Implement

It shall also be the cheapest. Persons therefore who are not willing to act as agents on the principle that "a nimble six-pence is better than a slow shilling," need not apply for an agency.

No Plows on commission. All sales absolute.

This is the only Steel Chilled Plow in

the World. the world.

Steel costs several times more than Iron.
But this Plow, full rigged, by giving small discounts, can be sold for Seventeen Dollars.
Compare this price with that of any Iron Plow

it is cheaper than any other Plow now made would be at five dollars and a half. Where there are no agents we will, on re-ceipt of Seventeen Dollars, send a Plow to any Railroad station in the State and pay the freight. Address,
