#### HOUSE, FARM AND GARDEN.

#### A Foolish Mistake.

Don't make the mistake of confound-ing a remedy of acknowledged merit ing a remedy of acknowledged merit with the numerous quack medicines that are now so common. We speak from experience when we say that Park-er's Ginger Tonic is a sterling health restorative and will do all that is claim-ed for it. We have used it ourselves with the happiest results for Rheuma-tism and when worn out by overwork. See advertisement. 18 Im See advertisement.

#### Wicked For Clergymen.

Rev. , of Washington, D. C., writes: "I believe it to be all wrong and even wicked for clergymen or other and even wicked for elergymen or other public men to be led in to giving testi-monials to quack doctors or vile stuffs called medicines, but when a really meritorious article made of valuable remedies known to all, that all physi-cians use and trust in daily, we should freely commend it. I therefore cheer-fully and heartily commend Hop Bit-ters for the good they have done me and my friends, firmly believing they have no equal for family use. I will not be without them."—Acw York Baptist Weekly. 19 2t Baptist Weekly. 19 21

#### Sunshine Cake.

Put the whites of eleven eggs into a a clean, cold bowl, and beat to a stiff, dry froth. The volks of four eggs were beaten light and poured in the beaten whites, and one cup of granulated sugar, one cupful of unsifted flour, to which add one teaspoonful of cream of tartar, and the whole then sifted once, and one teasponful of flavoring added .--The cake then turned into a heated pan, perfectly clean and dry, and set in a quick oven. There is considerable skill required to make this cake properly, but the most particular part is the baking .--The flour should be sifted and the other ingredients all measured out and ready for use before the eggs are beaten, and the cake should then be mixed with as little delay as possible. After it is placed in the oven the cold air should not strike it, and the stove should not be jarred, as even a slight shake would cause it to sink in the middle. After it is baked the pan should be turned upside down, and be so situated that a draft of air could pass between the inverted top and the table, and when perfectly cooled the cake will fall out. The loing for the cake with fall out. The icing for the cake is prepared by beating the yolks of three eggs lightly and mixing with them one cup of powdered sugar, then adding the juice of one-half a lemon, and after-ward another cup of sugar. It is then spread over the cake, and set at the door of the range and frequently turned until the idea to have a set of the sugar. the icing is hardened.

## Will They Live up to it?

A number of Maine girls have formed a protective union and adopted a series of resolutions for their government. The following extract from the constitution and by-laws gives a very fair idea of the nature of the objects and aims of the society: "That we will receive the attention of no self-styled young gentleman who has not learned some business or engaged in some steady employment.

It Simulates the Piyaline in the Saliva, which converts the Starch and Sugar of the food into glucose. A defi-clearcy in Piyaline cauces Wind and Souving of the food in the stomach. If the medicine is taken immediately after eating the fermentation of food is pre-vented. It defis upon the Liwe.

eating the fermentation of food is pre-vented. It acts upon the Liver. It acts upon the Kidneys. It Regulates the Boreats. It Purifies the Blood. It Purifies the Blood. It Promotes Dipertion. ### A Useful Recipe.

The following recipe for keeping lamp chimneys from cracking is taken from the Diamond, a Leipzig journal, devoted to the glass interest: Place your tumblers, chimneys or vessels which you desire to keep from cracking in a pot filled with cold water, and a little cooking salt, allow the mixture to boll over a fire.and then to cool slowly. Glass treated in this way is said not to crack, even if exposed to very sudden changes of temperature. Chimneys are said to become very dura-ble by this process, which may also be extended to crockery and stoneware, porcelain, etc.

#### How to Make Icing.

For hard loing, to the unbeaten white of every egg required add one quarter of a pound of powdered sugar, a very small quantity of cream of tartar and flavoring to inste, and mix gradually. Place the icing on different parts of the cake, and allow it to spread of itself. On the side the icing is spread with a silver knife dipped in ice-water, and carefully wiped if crumbs of cake should accidentally collect on the blade. Soft icing is made in the same manner, but with half the quantity of sugar.

To stone raising easily, pour boiling water over them, and drain it off. This loosens them, and they come out clean and with case.
