# The Bloomfield Cimes.

### HOUSE, FARM AND GARDEN.

### How to Sweep a Room.

To sweep and dust a room properly is an art, and all fine arts have a method. Well done it renovates the entire room, and the occupant takes possession feeling that "all things have become new." It is not merely a performance to be done by hands, but a work into which taste and judgment, in other words brain, must enter. Are there closets opening into the room to be swept? Arrange the shelves drawers or clothing preparatory to sweeping day; then let this be the first to be swept. Cover the beds with soiled sheets as also heavy articles that cannot be removed; first, however, carefully dust and brush them .-Remove all the furniture that can be easily set in the hall or the adjoining room, having first dusted It; then; taking a step-ladder, begin to sweep or brush or wipe the cornice and pictures.

Draw the shades to the top of the window, or if there are inside blinds, dust them carefully. Open the windows. All the dust is now in the carpet or air; and the current of the windows will soon settle it.

Now commence to sweep! not toward a door or corner, but from the outer edge of the room toward the center where the dust will be taken up with a small brush and dust pan. Go over the room once more-this time with a dampened broom; that removes the last bit of dust and gives the carpet a new, bright appearance. Replace the articles of furniture as soon as the air is entirely free from dust, uncover the rest and the room is new and clean. All this seems an easy thing to do, but there is not one in a hundred will follow out the delails. Some will sweep the dust into the hall, or from one room into another, and wonder why their house is so dusty again. Others forget the cornice and pictures; while a third class will do all but using the damp broom, which is as the finishing touch to a picture.

### Ensilage.

Mr. Mills, the apostle of ensilage, or the preservation of crops in a green state for fodder, the possibilities of which he is illustrating at Arrabeck farm, Pompton, N. J., lays down the following conditions as essential to success: Air must be perfectly excluded from the pit or silo by a uniform and continuous pressure of about 250 pounds to the square foot; the crop should have flowered before being cut, and the knives should be sharp enough not to tear the saccharine sacks. Last year Mr. Mills fed for seven months 140 animals, cows and horses, from ten acres of corn fodder. The past summer he fed for six weeks 100 cattle, mostly milch cows, from five acres of oats sown in the spring, and he believes that during the coming winter and until his corn crop for 1882 is ready be can, in spite of an inferior yield occasioned by the drought, keep 150 cattle on the corn fodder cut from twenty-five acres. Mr. Mills states that one ton of grass preserved green in a silo possesses as great feeding capacity as twenty tons of the best hay. These are startling figures, but if anyone feels disposed to dispute them Mr. Mills will gladly furnish the proof, and triumphantly point to his sleek and happy cows, whose rich milk brings one cent a quart more than the usual price. -N. Y. Tribune.

Let every farmer who is not able to fence a large pasture get a few boards, build a few rods of portable fence and make a small enclosure for his hogs and move it around as circumstances require. It will make pork raising more profitable than to keep hogs confined in pens all the time.

Cold boiled potatoes used as soap will clean the hands and keep the skin soft and healthy. Those not over-boiled are the best.

Land ploughed after the middle of May will generally yield better crops of corn than if ploughed in April.

It is said that a strong tea made from beiling sassafras roots used as a wash will kill lice on horses and cattle.

Labels placed in linseed oil and soaked will hold paint marks plain for

A teaspoonful of turpentine boiled with your white clothes will aid the whitening process.

### American Ladies.

The first impression Sara Bernhardt received of the American ladies manifested itself thusly:—"Oh! ze ladies, za are so beautiful, such clear complexion I nevare see before," all of which is due to the universal use of Swayne's Ointment for skin diseases, which insures a clear and clean complexion, and a healthy color. This recalls to mind the divine precept "cleanliness is next to Godliness." 46 4t

MRS. LYDIA E. PINKHAM, OF LYNN, MASS.,

# THE SEWING MACHINE.

Best in the World.

The manufacturers of the SPRINGFIELD are aware that, in order to meet the critical and economical demands of the times, the machine must possess a combination of mechanical excellences, making it superior to any of its predecessors, and at the same time be offered at a price that will place it within the means of all.

Fully realizing the force of these conditions, they offer the Springheid, confident that it will halfill every requirement that can be expected of a first-class family and manufacturing machine. Every Machine is warranted perfect in construction. In case any of the parts prove defective, when machine is used for family purposes, within five years from date of purchase, the manufacturers will replace such defective part without charge. This does not apply to needles shuttles, or bobbins. Made by

THE SPRINGFIELD Sewing Machine Company,

SPRINGFIELD, MASS.
