

## Construction closes doors

Danielle M. Murphy  
Collegian Staff

The west side doors of the Hammermill, Zurn, and Nick buildings, including the Plastics lab have been closed since Monday, April 5 due to construction of the new laboratory complex. The walkways leading to these doors are also closed and are planned to re-open sometime during the fall semester.

Construction on the new laboratory complex began now in hopes that the building will be up before winter. "The walkway was maintained as long as possible during construction," said John Ream III, Director of Operations.

Students can continue to enter the buildings from the quad area or the door on the east side of Nick, facing Turnbull.

Uh, who left out their Tonka toys?: Construction crews outside of the Nick Building continue to dig out the foundation for the future Plastics Engineering Technology to run along the west side of Nick, Hammermill and Zurn.

## Suites still leaking

by April M. Bogdanski  
Collegian Staff

The water leakage in the suites still hasn't gone away.

The water is running down the inside of the walls and through the cement floor, causing the floors in some first floor suites

to become saturated.

The problem, which first occurred last year, was addressed by Housing & Food Services, but could not be corrected by the designing architect nor other contractors.

"Housing and Food Services has called in the contractors and

architectural designers to try to determine the source of the problem," said James Bowen, Director of Housing and Food Services. "We are doing all we can to get the problem corrected."

Originally, the contractors believed that the situation was caused by an imbalance of temperature in the attic, so they placed vents in the roof.

"It seems that Housing is providing adequate support now, but we are very aggravated that the problem wasn't taken care of last year, as it should have been."

Communications

However, this conclusion was incorrect and the problem persists. It has now been suggested that leakage occurs due to the amount of water that thawed from the blizzard earlier this year. The problem would not occur if there were only a few inches of snow or a simple rain.

"It seems that Housing is providing adequate support now, but we are very aggravated that the problem wasn't taken care of last year, as it should have been," said Danette Parrett, a fourth semester Communication resident of the suites.

## STUDENT NIGHT MANAGER REED UNION BUILDING ( 2 POSITIONS AVAILABLE)

- \* Responsible for the evening and weekend management of the Reed Union Building
- \* Supervise student assistants working in service areas
- \* Ability to work independently and take initiative
- \* Demonstrate supervisory and leadership ability
- \* Ability to work with people of diverse backgrounds
- \* Extensive knowledge of the College
- \* Have and maintain a cumulative GPA of at least 2.5
- \* \$4.75/hr. for 20 hours per week (work-study preferred, wage-payroll available)
- \* Internship credit possible

Applications available in the Office of Student Activities/Union.  
**DEADLINE TO APPLY: FRIDAY, APRIL 23, 1993**
